

OVERVIEW

Main Analysis Findings

CULTIVATION
Approximately 2,600ha of land east of the Omo is likely under cultivation

NO DEVELOPMENT
No indications of current or preliminary development on western bank of Omo River within Sugar Block 1

SUGAR BLOCK 1
Encompassing both sides of the Omo River

CANAL EXTENDED
Primary irrigation canal from Omo River extends over 35km south and probably will be extended further south in coming months

NEW BARRIER
Newly constructed 500m barrier on Omo, causing serious upstream flooding and decline in water flow downstream

FLOODING
Flooding extent over 500ha in area upstream of barrier on 26 May 2012

NO ACCESS
Up to 130 small tribal settlements without direct access to Omo

CONSTRUCTION
Sugarcane processing mill constructed between September 2011 and early January 2012

NEW ROADS
Over 125km of new roads constructed
